

**ARCSPAN partners with COHOS EVAMY to deliver custom project  
and business management solutions.**

Arcspan is pleased to announce the signing of Canadian integrated architectural, engineering, interior design and planning firm, Cohos Evamy as a client. Cohos Evamy is well known for its diverse portfolio of high-profile projects such as the upscale retail centre Eau Claire Market and the Trans Canada Pipelines Tower in Calgary, to the Francis Winspear Centre for Music and world-renowned Stollery Children's Health Centre in Edmonton. Please visit [www.cohos-evamy.com](http://www.cohos-evamy.com) for further information.

Craig Finn, CFO of Cohos Evamy explains "...we feel that Arcspan is the best program designed to manage multiple projects within our multi-office, multi-disciplinary firm. With the implementation of Arcspan we will be able to provide management with more timely and accurate project information on each phase of every project. Arcspan's ability to task manage in full detail, will allow Cohos Evamy to better manage each part of the project, and provide our clients with a higher level of service."

This marks a notable shift in the Arcspan Professional Services Automation application as a new version with an architectural slant is currently being written and is expected to be completed by July 2006. The Arcspan Technical Team is working hard to add new features such as an advanced access levels matrix, as well as sub consultant and CRM elements. The entire Arcspan Team is looking forward to sharing this exciting new version with new and current clients in the near future.

Since 1995, Arcspan (a division of Acrodex Inc.) has been helping Consulting Engineers to manage their projects and businesses more effectively. Arcspan's integrated suite of online tools, specifically designed with Consulting Engineers and Architects in mind allows users to access the application anytime, anywhere and is comprised of the following modules: Project Management, Bi-Directional Interface with MS Project, Reporting and Analytics, Invoicing, Resource Management, Online Time Sheets, Online Expense Submissions, Online Approvals Systems and much more.
